Tie-Breaking Procedure

In the event of a percentage tie for any specific place, the team with the highest ranking will be determined by applying the following factors in the order listed, beginning with (a) if two teams tie or (aa) if more than two teams tie.

After the highest-ranked team is determined, the next ranked team will be determined by applying the factors, beginning with (a) or (aa) as applicable, for all other teams involved in the tie. If one factor does not resolve the tie, then the next factor will be applied for all teams involved in the tie.

The factors:

Two-Team Tie

(a) Head-to-head competition during pool play. (The winner will be put in the specific place, the loser in the next highest place.)

More Than Two Teams Tie

(aa) Games won percentage against all teams involved in the tie. (To calculate: total games won **DIVIDED BY** total games played.)

If two teams tie for the highest "games won percentage," the team that won their head-to-head competition during pool play will be put in the specific place, the other in the next highest place.

(bb) Points won percentage against all teams involved in the tie. (To calculate: total points won **DIVIDED BY** total points played.)

If two teams tie for the highest "points won percentage," the team that won their head-to-head competition during pool play will be put in the specific place, the other in the next highest place.

(cc) Apply factor (b) against the team (s) in pool play not involved in the tie.

(dd) Apply factor (c) against the team (s) in pool play not involved in the tie.

(ee) Playoff using one 15-point game per match. (Three-way tie format: One team draws bye, the other two teams play. Winner of first match plays the team that drew the bye.)
